

Free handy ruler

Our 'Handy Ruler' is the ideal tool to measure items that are cylindrical, straight, angular, or almost any shape for that matter!

It wraps around items, unlike a regular, rigid ruler, making it easy to achieve the correct measurements for your labels!

Follow the below steps; it's super easy!

- Carefully cut the Handy Ruler from the sheet.
- If you're measuring around an object, tape the ruler in place then wrap around the object firmly. A full wrap label should overlap slightly; we recommend a 5mm overlap.
- Note the measurements in (mm), double check for accuracy. Use the additional outer margin for marking your measurements.
- Head over to www.handylabels.co.uk to find your desired label size, shape and material. We can produce custom labels to your exact requirements. If you can't find your exact match, just call our helpful, friendly team on **01275 460516** to place your order.
- Await the speedy arrival of your Handy Labels parcel.
- Admire your perfectly sized, printed labels :)

Disclaimer

Measurements taken with the free Handy Ruler must be regarded as estimates only. Accurate validation of this tool can only be attained by use of a calibrated ruler or measuring tape. This document may shrink or expand due to the nature of paper. Handy Labels accepts no responsibility for any errors or miscalculations that result from the use of this tool. By using this tool, you agree to absolve Handy Labels from any and all inconsistency that may arise from the incorrect use of this free tool.
